Dangerous Heat for the Holiday Weekend

National Weather Service - Las Vegas

Issued: 2:36 AM PT Wednesday, September 2nd, 2020

Next Update: Tomorrow by 7 AM

Point of Contact: NWS Operations (24/7) - 702-263-9744 | nws.lasvegas@noaa.gov

CHANGES SINCE PREVIOUS BRIEFING

- Minimal changes to forecast temperatures.
- Excessive Heat Watch remains in effect.

CONFIDENCE AND DETAILS

Mojave Desert and lower elevations of southern Great Basin

HIGH Confidence

- Heat is the #1 cause of weather-related fatalities in Las Vegas and the United States.
- Prolonged exposure to heat can result in heat exhaustion and heat stroke.
- Increased risk to children and pets left in vehicles or outdoors.

MODERATE Confidence

- Higher temperatures may increase heat-related emergency calls.

Details:

Forecast high temperatures Friday through Labor Day:

- Las Vegas, Pahrump, Barstow, Morongo Basin: 108 to 112
- Lake Havasu City, Needles, Bullhead City, Overton, and other Colorado River communities: 112 to 117
- Bishop, Rachel, Beatty, Kingman: 102 to 106
- Furnace Creek (Death Valley National Park): around 123

If you have questions or would like to submit weather reports, photos, or to unsubscribe from these briefings, email nws.lasvegas@noaa.gov

Heat Returning for the Holiday Weekend

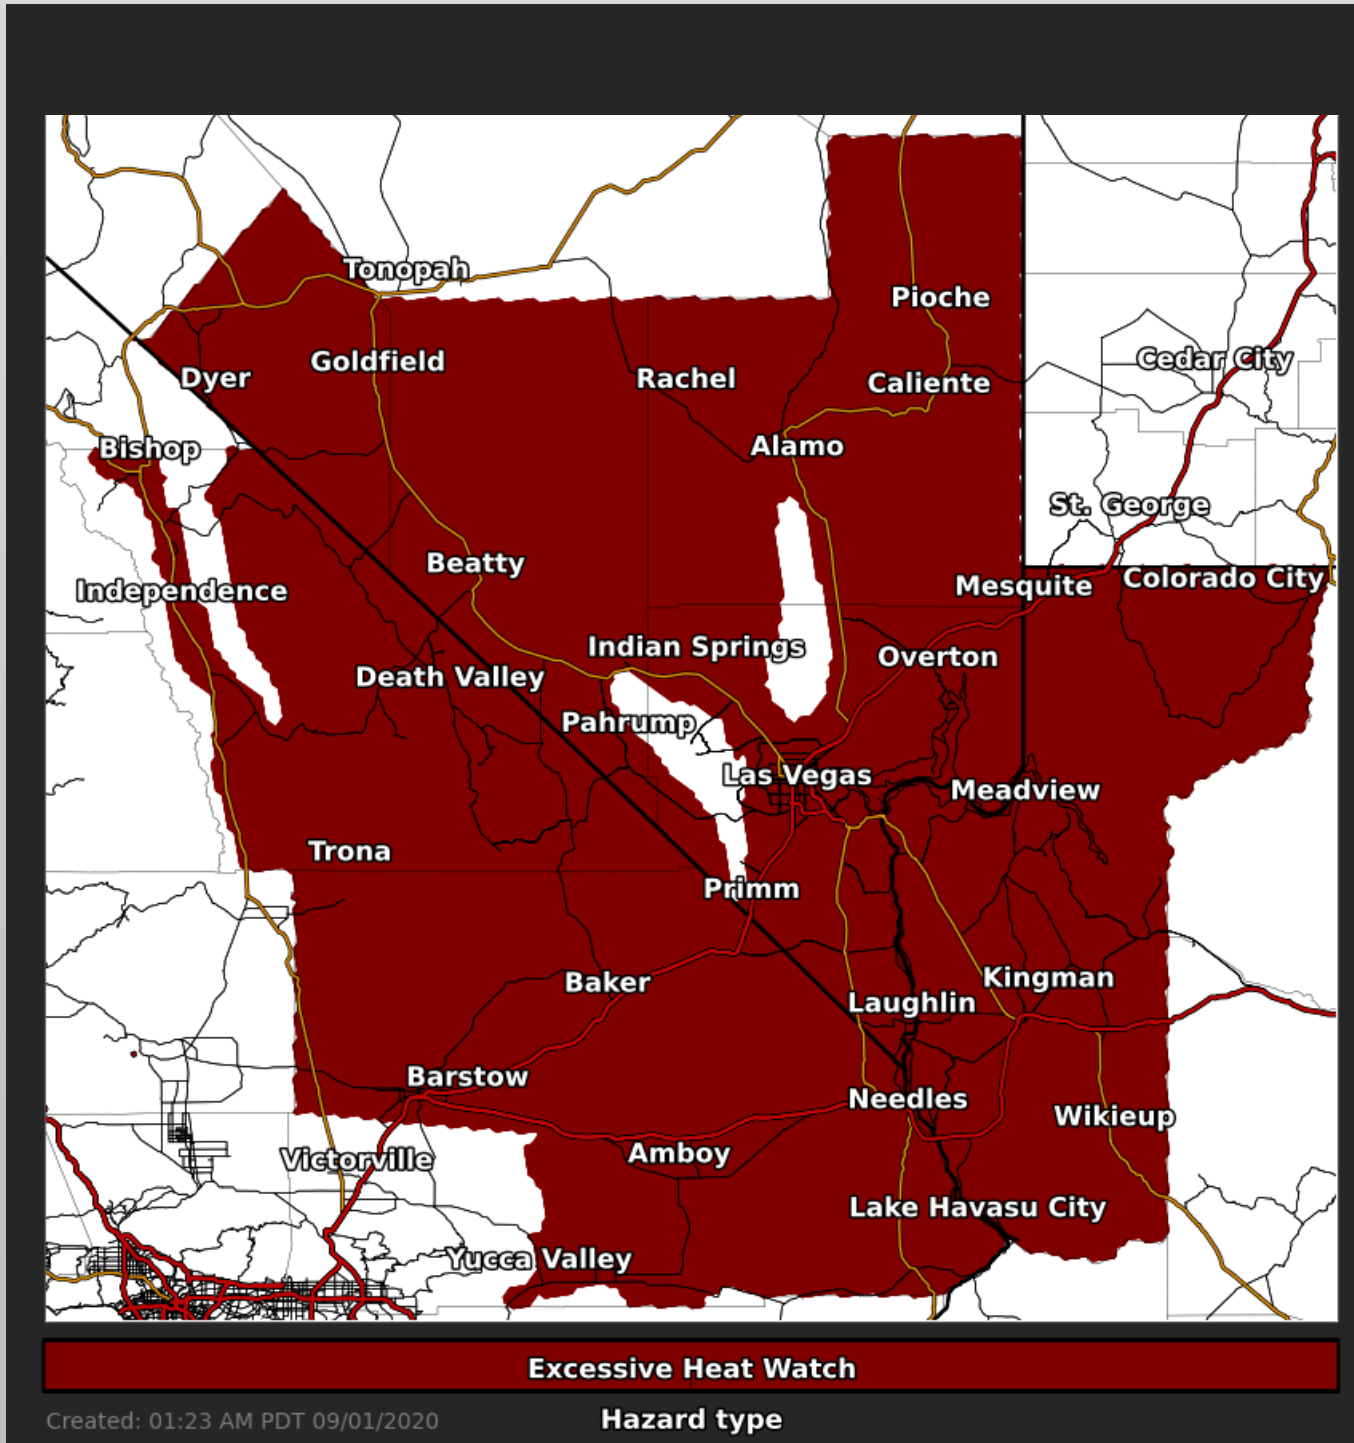

Expectations

- **Hottest** days Friday through Labor Day (and perhaps beyond?), with temperatures about 10 degrees above normal and flirting with records for early September.
- Widespread **High** to **Extreme** heat risk expected over the Labor Day weekend.

HEAT RISK LEVELS

Category	Level	Meaning
Green	0	No Elevated Risk
Yellow	1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration
Red	3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	4	Very High Risk for entire population due to long duration heat, with little to no relief overnight
